1973

Panza, G.F., Schwab, F.A., Knopoff, L., **1973**. Multimode surface waves for selected focal mechanism I. Dip-slip sources on a vertical fault plane. *Geophysical Journal International*, 34, 265-278.

1975

Panza, G.F., Schwab, F.A., Knopoff, L., **1975a**. Multimode surface waves for selected focal mechanism III. Strike-slip sources. *Geophysical Journal International*, 42, 931-943.

Panza, G.F., Schwab, F.A., Knopoff, L., **1975b**. Multimode surface waves for selected focal mechanism II. Dip-slip sources. *Geophysical Journal International*, 42, 945-955.

1981

Cuscito, M., Panza, G.F., **1981**. Determinazione simultanea del momento sismico e dei parametri strutturali usando sismogrammi sintetici completi. *Rendiconti Online Della Società Geologica Italiana*, 4, pp. 477-478.

Schwab, F., Frez, J., Panza, G.F., Liao, A.H., Kausel, E.G., **1981**. Surface-wave dispersion computations: Rayleigh waves on a spherical, gravitating Earth. *Bulletin of the Seismological Society of America*, 71, 613-654.

1982

Panza, G.F., Cuscito, M., **1982**. Influence of focal mechanism on shape of isoseismal: Irpinia earthquake of November 23, 1980. *Pure and Applied Geophysics*, 120, 577-582.

1983

Gusev, A.A., **1983**. Descriptive statistical model of earthquake source radiation and its application to an estimation of short-period strong motion. *Geophysical Journal International*, 74, 787-808.

1984

Schwab, F., Nakanishi, K., Cuscito, M., Panza, G.F., Liang, G. and Frez, J., **1984**. Surface-wave computations and the synthesis of theoretical seismograms at high frequencies. *Bulletin of the Seismological Society of America*, 74, 1555-1578.

1985

Panza, G.F., **1985**. Synthetic seismograms: the Rayleigh waves modal summation. *Journal of Geophysics*, 58, 125-145.

Suhadolc, P., Panza, G.F., **1985**. Some applications of seismogram synthesis through the summation of modes of Rayleigh waves. *Journal of Geophysics*, 58, 183-188.

1986

Panza, G.F., Suhadolc, P., Chiaruttini, C., **1986**. Exploitation of broad-band networks through broad-band synthetic seismograms. *Annales Geophysicae*, 4, 315-328.

1987

Panza, G.F., Suhadolc, P., **1987**. Complete strong motion synthetics. In: Bolt, B.A. (eds), *Computational techniques*, 4, 153-204. *Seismic strong motion synthetics*, Academic Press. ISBN: 978-0-12-112251-5.

Keilis-Borok, V.I., Kossobokov, V.G., 1987. Periods of high probability of occurrence of the world's strongest earthquakes. *Computational Seismology*, 19, 45-53.

1988

Suhadolc, P., Cernobori, L., Pazzi, G., Panza, G.F., **1988**. Synthetic isoseismals: Application to Italian earthquakes. In: Bonnin, J., Cara, M., Cisternas, A., Fantechi, R. (eds), *Seismic Hazard in Mediterranean regions*, 205-228. Springer Netherlands. ISBN: 978-90-277-2779-4.

Gregersen, S., Panza, G.F., Vaccari, F., **1988**. Developments toward computations of synthetic seismograms in laterally inhomogeneous anelastic media. *Physics of the Earth and Planetary Interiors*, 51, 55-58.

1989

MacBeth, C.D., Panza, G.F., **1989**. Modal synthesis of high-frequency waves in Scotland. *Geophysical Journal - Oxford*, 96, 353-364.

1990

Panza, G.F., Prozorov, A., Suhadolc, P., (1990). Is there a correlation between lithosphere structure and statistical properties of seismicity? In: Cassinis, R., Panza, G.F. (eds), *The structure of the Alpine - Mediterranean Area: Contribution of Geophysical Methods*. Terra Nova, 2, 585–595.

Keilis-Borok, V.I., Kossobokov, V.G., 1990. Premonitory activation of seismic flow: Algorithm M8. *Physics of the Earth and Planetary Interiors*, 61, 73-83.
[https://doi.org/10.1016/0031-9201\(90\)90096-G](https://doi.org/10.1016/0031-9201(90)90096-G).

1991

Florsch, N., Fäh, D., Suhadolc, P., Panza, G.F., **1991**. Complete synthetic seismograms for high-frequency multimode SH-waves. *Pure and Applied Geophysics* 136, 529-560.

Panza, G.F., Craglietto, A., Suhadolc, P., **1991**. Source geometry of historical events retrieved by synthetic isoseismals. *Tectonophysics*, 193, 173-184.

Panza, G.F., **1991**. The theory and some applications of synthetic seismograms to strong motion data and macroseismic informations. In: Fantechi, R., Almeida-Teixeira, M.E. (eds), *Earthquake hazard assessment*, 65-78. Commission of the European Communities.

1992

Costa, G., Panza, G.F., Suhadolc, P., Vaccari, F., 1992. Zoning of the Italian region with synthetic seismograms computed with known structural and source information. In: 10th World Conference, *Earthquake Engineering*. Balkema, Rotterdam. ISBN: 9054100605.

1993

Fäh, D., Lodice, C., Suhadolc, P., Panza, G.F., **1993**. A new method for the realistic estimation of seismic ground motion in megacities: the case of Rome. *Earthquake Spectra*, 9, 643-668.

Costa, G., Panza, G.F., Suhadolc, P., Vaccari, F., **1993**. Zoning of the Italian territory in terms of expected peak ground acceleration derived from complete synthetic seismograms. *Journal of Applied Geophysics*, 30, 149-160.

[https://doi.org/10.1016/0926-9851\(93\)90023-R](https://doi.org/10.1016/0926-9851(93)90023-R)

Eurocode 8, 1993, Structures in Seismic Regions –Design – Part 1 General and Building, EC8/EN 1998, TC250/SC8/N57A.

1994

Fäh, D., Suhadolc, P., Mueller, St., Panza, G.F., **1994**. A hybrid method for the estimation of ground motion in sedimentary basins: quantitative modelling for the Mexico City. *Bulletin of the Seismological Society of America*, 84, 383-399.

1996

Panza, G.F., Vaccari, F., Costa, G., Suhadolc, P., Fäh, D., **1996**. Seismic input modeling for zoning and microzoning. *Earthquake Spectra*, 12, 529-566. <https://doi.org/10.1193/1.1585896>.

Orozova-Stanishkova, I.M., Costa, G., Vaccari, F., Suhadolc, P., **1996**. Estimates of 1Hz maximum acceleration in Bulgaria for seismic risk reduction purposes. *Tectonophysics*, 258, 263-274. [https://doi.org/10.1016/0040-1951\(95\)00205-7](https://doi.org/10.1016/0040-1951(95)00205-7)

1997

Panza, G.F., Cazzaro, R., Vaccari, F., **1997**. Correlation between macroseismic intensities and seismic ground motion parameters. *Annali di Geofisica XL*, 40, 1371-1382. DOI: 10.4401/ag-3872

UNESCO-IUGS-IGCP project 414: Realistic modeling of seismic input for megacities and large urban areas, 1997-2001

1998

Sun, R., Vaccari, F., Marrara, F., Panza, G.F., **1998**. The main features of the local geological conditions can explain the macroseismic intensity caused in Xiji-Langfu (Beijing) by the Ms = 7.7 Tangshan 1976 earthquake. *Pure and Applied Geophysics*, 152, 507-521. <https://doi.org/10.1007/s000240050164>.

1999

Panza, G.F., Vaccari, F., Cazzaro, R., **1999**. Deterministic seismic hazard assessment. In: Vrancea earthquakes: Tectonics, hazard and risk mitigation, 269-286. Springer, Dordrecht, Netherlands.

Wald, D. J., Quitoriano, V., Heaton, H.T., Kanamori, H., **1999**. Relations between peak ground acceleration, peak ground velocity and Modified Mercalli Intensity in California. *Earthquake Spectra*, 15, 557-564. <https://doi.org/10.1193/1.1586058>.

Romanelli, F., Vaccari, F., **1999**. Site response estimation and ground motion spectrum scenario in the Catania area. *Journal of Seismology*, 3, 311-326. <https://doi.org/10.1023/A:1009847213825>.

2000

Bus, Z., Szeidovitz, G., Vaccari, F., **2000**. Synthetic seismogram based deterministic seismic zoning for the Hungarian part of the Pannonian basin. *Pure and Applied Geophysics*, 157, 205-220. <https://doi.org/10.1007/PL00001095>.

Radulian, M., Vaccari, F., Mandrescu, N., Panza, G.F., Moldoveanu, C.L., **2000**. Seismic hazard of Romania: deterministic approach. *Pure and Applied Geophysics*, 157, 221-248.

Zivcic, M., Suhadolc, P., Vaccari, F., **2000**. Seismic zoning of Slovenia based on deterministic hazard computations. In: Panza, G., Radulian, M., Trifu, C. (eds), *Seismic Hazard of the Circum-Pannonian Region*, 171-184. Birkhauser Verlag, Basel. ISBN: 978-3-0348-8415-0.

Markušić, S., Suhadolc, P., Herak, M., Vaccari, F., **2000**. A contribution to seismic hazard assessment in Croatia from deterministic modeling. In: Panza, G., Radulian, M., Trifu, C. (eds), *Seismic Hazard of the Circum-Pannonian Region*, 185-204. Birkhauser Verlag, Basel. ISBN: 978-3-0348-8415-0.

Bus, Z., Szeidovitz, G., Vaccari, F., **2000**. Synthetic seismogram based deterministic seismic zoning for the Hungarian part of the Pannonian basin. In: Panza, G., Radulian, M., Trifu, C. (eds), *Seismic Hazard of the Circum-Pannonian Region*, 205-220. Birkhauser Verlag, Basel. ISBN: 978-3-0348-8415-0.

Aoudia, A., Vaccari, F., Suhadolc, P., Meghraoui, M., **2000**. Seismogenic potential and earthquake hazard assessment in the Tell Atlas of Algeria. *Journal of Seismology*, 4, 79-98. <https://doi.org/10.1023/A:1009848714019>.

2001
